ALLOWANCE

Claims 2-23 and 27-55 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach a banknote validator including an *additional* sensing element in the form of operating coils situated adjacent to the edge of the sensor, in which the operating coils form a magnetic field which is responsive to changes in inductance and conductivity caused by changes in magnetic or inductive properties of a banknote as it is moved past the sensing element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 5614824, 6382386, 5278500, 5014006, and 6057683 all disclose related induction sensors that could be used for banknote evaluation.

Art Unit: 2862
